PROFILE

As an aspiring web developer from Andhra, I am currently pursuing my B.Tech in Computer Science at Srinivasa Institute of Engineering and Technology. My academic journey has been fueled by a passion for technology and a desire to create impactful digital experiences.

I have a foundational understanding of web development, with hands-on experience in HTML, CSS, and JavaScript. These skills have allowed me to start building simple yet functional web pages, and I am eager to deepen my expertise and explore more advanced technologies and frameworks.

PROJECTS

GOCONNECT .

Goconnect is a platform used to bridge the gap between the alumin and the students. This help present graduating student to sharpen their career by the guidance and advices of the experienced aluminum.

Quick port.

Quick port is ai based website that will make a quick portfolio by taking users data and input in a structured form and make their resumes in different templates
